

Project 1 – Additional Requirements

You will create a PowerPoint Presentation

- Create a PowerPoint presentation adhering to the requirements below.
- Utilize Conference Call Recording Software:
- Employ conference call recording software such as Zoom, WebEx, or MS Teams for the presentation.

YouTube Channel Setup and Video Upload:

- Establish a YouTube channel and upload the presentation video as per the specified requirements.
- Submission Process:
- Copy the video link and upload it to the designated dropbox in iCollege.

PowerPoint Slide Show Guidelines:

- User: Clearly state the problem and outline general requirements including inputs and outputs.
- Design: Provide an overview of the solution, highlighting key design features, user interface, UML class diagrams, and pseudo code. Utilize Transforms, Transitions, and Animation for enhanced presentation.
- Testing (if applicable): Explain the testing process, including the test plan, data used, and bug tracking/reporting.
- Group Team Name: Assign a team name related to Mobile Application Dev Project.
- Presenter(s): It is mandatory for all team members to participate in the presentation. Options for presenting include: Allowing each team member to present their individual work. All parties must actively engage in the presentation process.
- Incorporate Code Snippets: Utilize PowerPoint to present, ensuring to insert code snippets within slides.

YouTube Channel Guidelines:

- Title Video: Name it following the format "Task Name_Team Name".
- Duration: Aim for a video length of 10-15 minutes.
- Participation: All team members must contribute to the video.
- Channel Creation: Establish a YouTube channel with the group name.
- Recording Presentation Software: Choose from options such as Zoom, Microsoft Teams, WebEx, or Discord.
- Channel Setup Instructions: Follow steps to create a YouTube channel as outlined.
- Upload Process: Once prepared, upload the video to the channel for future reference and submissions.

Grading Criteria:

- Key aspects include effective application of concepts, aesthetic choices such as font and color, creativity, navigation usability, and adherence to design principles.

- Ensure compliance with all stated requirements for submission to receive full credit, including the presentation description, team member details, wireframe UI, and the presentation link on YouTube.
- Submit the **GitHub Repository link** and the presentation **YouTube link** to the designated dropbox for accurate grading and reporting. Simply submitting the file to iCollege will not suffice.
